Abstract: in this article, there is a scientific discussion about society, information about corruption, how to prevent it and how to get rid of it. Corruption. What is corruption. How can we lose it? Does it have a solution? Why can corruption arise or increase rapidly? In today's article, we will try to find solutions to these problems

Key words: Corruption, society, evil, our country, problem, youth, rise

About: FARS Publishers has been established with the aim of spreading quality scientific information to the research community throughout the universe. Open Access process eliminates the barriers associated with the older publication models, thus matching up with the rapidity of the twenty-first century.

It would be a lie to say that there is no corruption, corruption is going on in us. It is necessary to fight against corruption with the whole public
(President of the Republic of Uzbekistan Sh. M. Mirziyoyev)

INTRODUCTION.

Corruption. This is our worst enemy and a great opportunity for us to deceive ourselves. It would not be an exaggeration to say that this does not allow the country to grow, it is the biggest obstacle that can prevent the youth from becoming enlightened and spiritual. Right now, corruption meets us at every step. This is a big problem and a big loss for us. In fact, corruption is caused by us, the people. Only conscious people can do this and only conscious people can prevent this situation. So it's all up to us.

SUBJECT DOLLARITY

Currently, we are witnessing many cases of corruption. In the vernacular, the phenomenon known simply as bribery, or corruption in a broad sense, undermines all reforms. Corruption is a social phenomenon expressed in the use of official positions by employees of state bodies for material or property purposes, for the purpose of illegal personal gain. In fact, corruption is an official taking advantage of his management powers and rights for personal gain, contrary to the law and ethics. Hundreds and thousands of studies have been conducted by experts, various institutes and international organizations to determine the causes of its origin and to find effective ways to fight against corruption. Specific ratings were created and tables were created with various indicators and numbers. Even formulas of various forms of corruption have been developed. So far, there is no one-size-fits-all solution to the fight against it that works for all nations. The fact is

that the root of corruption changes with the geography of its occurrence. So, what factors create conditions for it to sprout and "prosper" in Uzbekistan? There are people who have desires, there are people who make mistakes. Due to lust and interest, people have suffered unjustly from the unjust judgments of unjust rulers and judges. There are no verses revealed in the Qur'an, which is considered to be a divine book, about not misappropriating other people's property or taking possession of other people's property in exchange for bribing judges. This disease is so bad that even the more we talk about it, the less we talk about it. As much as possible, we should prevent this condition, not eliminate it.

LEVEL OF STUDY OF THE SUBJECT

Corruption manifests itself in various forms and forms as a result of economic, political and social problems in society. Taking advantage of public office to receive illegal gifts (more precisely, bribes) often occurs during the period of reforms. In many cases, bribing an official to solve the problems of citizens not only speeds up the solution of the problem, but also 100% decides in favor of the applicant. From the end of the 18th century, there was a sharp turn in the society's attitude to corruption in the West. Liberal reforms were carried out under the motto that the state power should serve the welfare of the people under it, and that the citizens should feed the officials so that they work in compliance with the law. In particular, the US Constitution, adopted in 1787, considered bribery to be the most serious crime, and in such cases it was noted that even the president of the US could be impeached..

The opinion of people in the society about corruption in our republic was studied. According to him, 21% of people said corruption in the education system and 14% in the medical field. How realistic is this? In fact, this is true! I think more people will agree with my opinion.

PREVENTION OF CORRUPTION.

Everyone talks about corruption, but in my opinion, many people still talk about this topic. It cannot be lost, but it can be prevented. Let me tell you about these solutions one by one:

1. In order to prevent corruption, both the giver and the receiver are subject to the same criminal liability, and in the case of an official who received, a heavier punishment and deprivation of the right to work is an appropriate punishment.

2. Keeping the identity of the witness of corruption a secret, if someone reveals his identity, he should be held accountable before the law and the witness should be financially encouraged

3. Appoint a special anti-corruption officer at each organizational location and not reveal his identity to anyone.

4. Conducting religious discussions in higher educational institutions and state organizations, explaining to them that these activities are condemned from the point of view of religion

We must not forget that each of us is a human being first, that this world is transitory and that we live in a trial world! In fact, raising the legal consciousness and legal culture of the population in the fight against corruption, forming an uncompromising attitude towards corruption in the society, increasing the legal literacy of the employees of state bodies and other organizations, legal education and training in the field of fighting corruption in educational institutions is one of the important tasks of today. Because people with a high level of legal consciousness and legal culture, who are mature in terms of legal education and upbringing, do not allow corruption, which is a negative vice.

CONCLUSION

In short, every human being has the same concern for our country, we must always serve it faithfully, and we must give up this vice called corruption. It is very bad to live like this, knowingly not getting out of this quagmire. Let's not forget that these days, this world, this career, this appearance, these walks are all fleeting.

Let's not forget that we are all responsible for the peace and well-being of our country. This is our country.
